

EXIT

EXTENDED Insulin infusion feasibility Trial

STUDY

OMNIPOD 5 EXTENDED WEAR

Are you interested in taking part in a research study using a tubeless patch insulin pump? The EXIT Study examines extended 5-day wear of the Omnipod 5 Automated Insulin Delivery (AID) system.

INCLUSION CRITERIA

- Have type 1 diabetes
- Are aged 16 years or older
- Currently use an insulin pump and CGM
- Have a total daily insulin dose of 40 units or less
- Can attend six in-person visits in Hamilton, scheduled over approximately 4 weeks

DETAILS

-  Primary Investigator: Dr Martin de Bock
 -  HDEC Reference: 2025 FULL 24765
- Study funded by Insulet
